Passionate and driven web developer proficient with JavaScript, HTML, CSS, jQuery, Bootstrap, Git, Node.js, AJAX, SQL, MongoDB and APIs. Adept analytical problem solver with experience working in a diverse work environment. Life-long learner of new technologies and constantly refining skill set.

TECHNICAL PROJECTS

Pic-a-Flic

- Movie selection application to help indecisive movie watchers to choose a movie to watch. User can select parameters to filter results and then has three random films returned using multiple API calls.
- Lead JavaScript & API Developer on a team of 4
- <https://supernatmor.github.io/PADM/>

Bamazon

- Amazon-like storefront using mySQL and Node.js. Includes separate views for Customers, Managers, and Supervisors.
- Sole Developer
- <https://github.com/Zarnerz/liri-node-app>
- Video Demonstration: <https://youtu.be/Pmtoc-WZ3r8>

Dragon Ball Giphy API App

- Web application that allows users to input their favorite characters from the Dragon Ball universe to create a button that will display 10 gifs when pushed. Utilizes JavaScript, jQuery, AJAX and the Giphy API to grab the data and then append them onto the page which was made with HTML, CSS, & Bootstrap.
